Inter-company (grouped) Training

Act! User Training course

Training objectives

Master the standard and advanced features of your Act! software. At the end of the day users are operating on the use the software. The administration software is subject to further training of its own. This training can also be provided to the administrator of Act! who can in turn provide this training to end users.

Location

Remotely (preferred) or on our premises.

Duration

1 day (7 hours).

Intended audience

Act! end users.

Prerequisites

Good knowledge of customer relationship management and flow of the company. Basic understanding of the Windows environment.

Equipment and software

Each attendee must have a computer with the software which is the subject of the training installed. Remote Training courses require an Internet access and a phone or a computer with microphone/speakers (headset recommended). The videoconferencing solution that we are using allows each participant to follow the training from anywhere, by teleworking or from one of his company's sites. Phone calls are free from 34 countries, internet calls are totally free.
